SUMMARY

Enthusiastic full-stack software developer with experience in building applications with real-world use and leveraging the benefits of agile development environments. Skilled in frontend development with technologies like React.js and Next.js, as well as backend technologies like Node.js and both relational and document databases. Known for a problem solving attitude and collaboration skills.

EXPERIENCE

Fullstack Software Developer

Luísa Redinha Advogados & Associados

09/2024 Leiria, Portugal - Remote

- Freelance Software Developer, responsible for creating 2 websites for a legal professional.
- Developed a fully responsive NextJS web application featuring an interactive contact form and direct links to social media and other contact channels.
- Managed and maintained custom email inboxes, associated with a custom domain for the provided service.
- Responsible for choosing the appropriate hosting service, and establishing a CI/CD pipeline.

Software Developer Graduate

Boolean UK

02/2024 - 08/2024 Remote

- Completing 6 months full time 1000+ hours of intensive full stack software development bootcamp.
- Gained hands-on experience building real-world applications with React, Node.js, Express.js and other JavaScript based frameworks, as well as backend technologies like Prisma, PostgreSQL, MongoDB, Redis, as well as other APIs and libraries.
- Led small teams in agile environments to develop fullstack applications.
- Contributed by helping to solve problems and answer questions from other teams.

Freelancer at Upwork

Self Employed

01/2023 - 03/2024 Remote

- Implemented various frontends for drop-shipping stores, online services and blogs using technologies like React, or through web services like WordPress and Shopify.
- Worked with other people responsible for the design aspect of the website, SEO and ads.

| React.js | React Router | Redux | Jotai |
| Node.js | Express.js | Next.js | |
| MongoDB | PostgreSQL | MySQL | |
| Redis | Prisma ORM | Clean Code | |
| CI/CD | Docker | Git | Jira Scrum |

PROJECTS

Legal Services Website

https://livredemultas.pt/ and
https://advogados-leiria.pt/

These websites were developed while working for **Luísa Redinha Advogados & Associados**. Both websites offer services related to their law firm.

- Bought the domain and configured it's DNS, alongside the associated email inboxes.
- Created the design and fully developed the whole website using Next.JS, Typescript, Sass, Framer-Motion and Nodemailer.
- Developed a contact system that allows users to submit their documents, and associated data, directly to the domain email.

Personal Portfolio

https://rafa-lopes.netlify.app/

This is my software developer portfolio, showcasing some real life and fictive projects I worked on in order to strengthen my coding skills.

- Tech stack: React.js, TailwindCSS

Tea Shop E-commerce Store

https://github.com/rafa-lopes-pt/tea-shop

Fictive project showcasing the whole development process from a client request to a final full stack working application, including design and user flow documents.

- Tech Stack: React.js Node.js Sass.
- This project focuses more on the front end skills, developing common UI components from scratch, like dialogs and accordions as opposed to using pre-made 3rd party libraries like Bootstrap.
